

Service Name	RISK ASSESSMENT FOR YOUTH WHO SEXUALLY HARM
	This service may be provided in an inpatient and/or outpatient setting. When conducted in an inpatient setting the risk assessment not reimbursed separately.
Facility License	As required by DHHS Division of Public Health.
Basic Definition	The purpose of the risk assessment is to identify how mental health/substance use disorder diagnoses relate to sexually harmful behavior and to provide a risk assessment to develop individual treatment recommendations, if indicated. This is not a forensic evaluation, but is intended to guide treatment.
Service Expectations basic expectations for more detail see Title 471 chapters 32	<ul style="list-style-type: none"> • This is a service provided for individuals age 20 or younger. • The need for this assessment is based on medical necessity as determined by a licensed clinical psychologist or psychiatrist upon completion of an Initial Diagnostic Interview. • The practitioner completing the assessment will collaborate and disseminate the assessment results with other professionals involved. • The components for a sexual offender risk assessment include: <ul style="list-style-type: none"> ○ demographic: the reason for the assessment (police, IDI and court records); interviews with family, individual and other relevant contacts; review of previous assessments/testing. ○ family dynamics/relations; individual background information i.e. social, school, legal, mental health, substance abuse, sexual offense history, trauma/victimization history, and personal strengths. ○ psychological evaluation: cognitive/adaptive functioning (at the psychologist's discretion when there are adequate records for review), sex offender risk assessment, sexual misconduct. ○ patterns/perceptions/understanding/motivation/empathy for victim/supervision and access to victims and strengths. ○ treatment recommendations which will include an assessment of the risk for reoffending. • Addendums to the risk assessment are appropriate when the individual has had a subsequent offense and the assessing provider had completed a full risk assessment previously. In these cases, the provider must conduct an updated risk assessment and also update other pertinent information contained in the original/prior assessment(s). The original risk assessment must be attached to the addendum in order to provide a complete clinical assessment.
Length of Service	One assessment
